

Second Green Energy Technologies business mission to South East Asia targets Singapore and the Philippines

27 Feb. 2017

After a successful first [Green Energy Technologies](#) [1] **business mission** to South East Asia back in October 2016, EU Gateway | Business Avenues organises another mission, this time to **Singapore and the Philippines**, from **23-27 October 2017**

Selected European companies will exhibit their technologies and services at the [Singapore International Energy Week 2017](#) [2] - an annual week-long platform for energy professionals and policymakers to discuss best practices and solutions in the domain - and after three days they will travel to the Philippines for a new round of **B2B meetings with potential local business partners**.

This is a **EU-funded initiative** offering a wide range of business services. Through a [dedicated](#)

[team](#) [3] in Europe as well as in South East Asia, EU Gateway | Business Avenues **supports European companies** looking for long-lasting business collaborations in Asia at every step of the internationalisation process with [strategic, organisational and financial services](#) [4].

For further practical details on this business mission, download the **business mission information document** and [apply now](#) [5]! Deadline for application is **16 June 2017**.
